

1. Connect to LibraryPublicHotspot wireless network.
2. Go to www.marlbroughpubliclibrary.org
3. Go to the Services menu. On the Technology page click [Wireless printing](#).
4. Choose Windows or Mac link according to the system you are using.

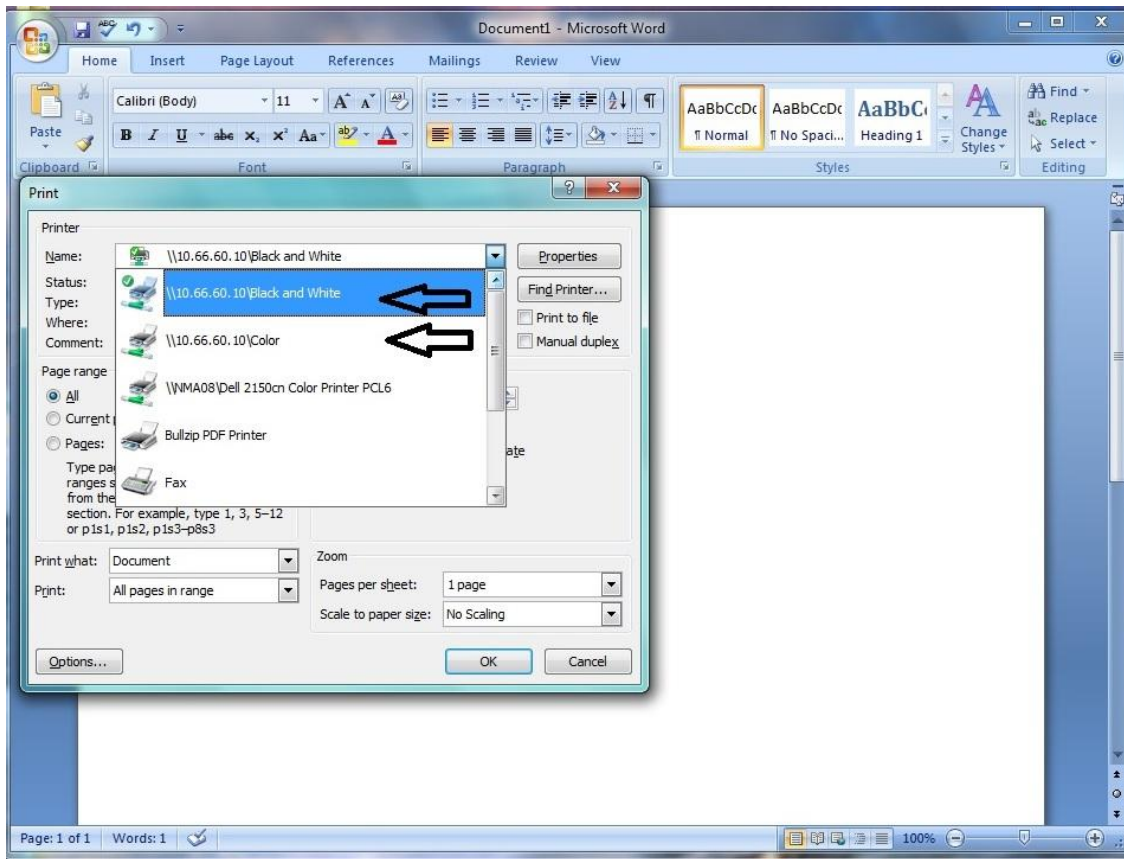

5. On the bottom of the screen click "Run" the clientlauncher.exe
6. If an error message pops up, click on Actions and then choose Run anyway. There may be another error message on some computers saying that the SmartScreen Filter is blocking the download. Go to Tools/Internet options/Advanced and uncheck the "Enable SmartScreen Filter" option.

7. Allow windows to install the driver. The printer will temporarily install on your computer and will be deleted when the computer is restarted. If you see the red and yellow "LPT: One Print Client" printer icon at bottom of screen, you are ready to print.

8. Open the document you want to print, click print and choose “Black and White” or “Color” printer.

9. Use your library card number or create a user ID when prompted (you will need it to release your print job)

10. Click OK to accept the price (\$.15 pp black & white, \$.25 pp color), and OK again to complete the process.

11. Go to the Print Release station to pay and release your print job.
